### **Innovative ([www.ietl.in](http://www.ietl.in)) Completes the performance trials for its Biogas H<sub>2</sub>S Scrubber system –Bioskrubber™ at M/S.Natural Sugars and Allied Industries Ltd ([www.naturalsugar.in](http://www.naturalsugar.in))**

Natural Sugar & Allied Industries limited (NSAI) is an ISO 9001-2000 company and the first sugar company in Private sector after delicensing of sugar sector in the year 1998. The Company is situated at Ranjani, Tal. Kallam Dist. Osmanabad , Maharashtra, India.

Natural sugar & Allied Industries Limited ([www.naturalsugar.in](http://www.naturalsugar.in)) have recently installed 1.4 MWe Biogas Genset based d power generation project at their distillery unit. The project is in the final stages of start-up.

The performance trails for our Bioskrubber™ Biogas Desulphurisation system have been extremely successful and we have been able to successfully optimise our process utilities even further. We have achieved the Caustic Lye consumption of only 60% of our committed utility requirement. This will further reduce our operating cost and benefit the customer

Innovative Environmental Technologies Pvt. Ltd. ([www.ietl.in](http://www.ietl.in)); an enterprise developed by Mr.Chandan Gadgil; is dedicated to biogas recovery, cleaning,upgradation and renewable energy generation from biogas.

Today, IETPL is one of the renowned enterprises in the field of Biogas based renewable energy generation in India.

IETPL now also offers state-of-the-art solutions for Biogas Upgradation System.

At IETPL, the emphasis is on Resource - Recovery & Optimization through Innovation; thereby promising an excellent return on investment and making them commercially viable.
