Innovative bags new order for Effluent Treatment Plant at Privi Organics Ltd, Maharashtra

Innovative has received an order for design, engineering, supply, erection and commissioning of Effluent Treatment Plant(ETP) at the Mahad, Maharashtra unit of M/S. Privi Organics Ltd, India's leading aroma chemical manufacturer

Innovative Environmental Technologies Pvt. Ltd. (Innovative), an enterprise based in India, dedicated to promoting new technologies in non-conventional energy. Innovative is a group of qualified, experienced & dedicated technical experts in the field of Sulfur removal & power generation from gasses such as biogas, natural gas etc.

Innovative also has experience in the treatment of industrial effluents especially biogas plants covering a wide range of industries such as Sugar, Distillery, Brewery, Pulp & Paper, Food Processing, Dairy, Starch, Yeast, Slaughter House, Pharmaceuticals, Petrochemicals, Municipal Sewage etc.

Innovative will provide an optimally designed Effluent Treatment Plant to M/S. Privi Organics Ltd to take care of the stringent norms for the disposal and/ or recycle of generated effluent from Privi's chemical process.

The system will consist of anaerobic Biomethanation system based on Up Flow Anaerobic Sludge Blanket (UASB) Optima Technology, a biogas holder and this generated biogas will be utilised as an alternative fuel in order to save conventional fossil fuel.

The plant will be commissioned and will be ready for operation by August 2010

Privi Organics Limited

Privi started manufacturing aroma chemicals in the year 1992 with only two products, which it gradually expanded to a range of over 50 products today, having a capacity of over 7000 tons per annum. Privi also develops and produces custom-made aroma chemicals as per specific requirement of the customer. The research specialists at in-house R & D centre continuously thrive to develop new products and processes.

The Quality Management System (QMS) of Privi Organics have the ISO 9001:2008 certification. Privi Organics has also recently been conferred with ISO 14001:2004 certification for its Environmental Management System (EMS). Both these certifications are from Bureau Veritas.
